Each table shows the top publications sorted by impact factor. The year column 2010 refers to the impact year so it measures the impact from the papers published in the years: 2008 and 2009.

For comparison, several high quality natural science journals such as Physical Review A (PRA, founded in 1893) and the Journal of Molecular Imaging and Biology were also measured and had Google Scholar impact factors of 2.37 and 2.56, respectively.
